Disassembly & take back of the Easybox by our staff or by yourself

CHOOSE YOUR PHOTOBOOTH

THE 180° PHOTOBOOTH

With our 180° photobooth, your attendees will have the opportunity to take photo frozen in time thanks to our new concept inspired from the Matrix movie "the bullet time effect".

How does this work? Several reflex cameras are set up in our photo booth and will capture several photos of the attendees previously positioned in a predefined space in order to realize a video sequence up to 180°.

CHOOSE YOUR PHOTOBOOTH

THE 360° PHOTOBOOTH

Always in the aim of entertaining and attract more of your attendees, here is the rotary photobooth which creates unique selfies video on 360°. The 360° video can be viewed immediately on the screen of the photo booth in order to offer everyone the possibility to share it via email.

From the shot to the interface and the equipment, everything can be personalized!

The photo shot is made by a fixed photo booth, only the participants are turning. The back drop being fixe, you can add a personalized back as you wish.

The rotary photobooth, as its name indicates, is a platform of 80cm which can easily receive 2 people, and maybe 3.
